San Francisco Department of Public Health
Associate Professor of Medicine, UCSF

California PrIIDE Prep for PrEP
November 15, 2016
PRE-EXPOSURE PROPHYLAXIS PROCESS MAP
A wide range of competencies are needed to implement activities that will lead to PrEP adoption

- Social marketing
- Outreach strategies to potential users through PrEP ambassadors
- Clinical provider education (e.g., public health detailing)
- Client education/MI about PrEP linked to HIV testing
- Client/patient navigation, including benefits eligibility
- Wrap around services (substance use/MH/housing)
- Establishing provider directories
- Data to PrEP - working with DIS to identify PrEP candidates and refer
- Provision of PrEP (e.g., STD clinics)
- Surveillance/evaluation to track PrEP awareness/use
- Policy development/financing
To support a peer-to-peer network of health departments sharing best practices and innovations catalyzed by Project PrlDE—a health equity-focused PrEP and Data to Care (D2C) demonstration project that aims to reduce new HIV infections among MSM of color and transgender persons.

**PrEP WORKING GROUP**

**PrEP Working Group**

133 members  
Last Activity: 11 hours ago  

Sites are evaluating a wide range of strategies to spur demand for PrEP among MSM of color and transgender persons. This working group will explore these different strategies and share successes and challenges in managing PrEP programs.

Eight CBA Providers to Serve Health Departments

- HIV Testing
- Prevention with HIV-Positive Persons
- Prevention with High-Risk HIV-Negative Persons
- Condom Distribution
- Organizational Development and Management
- Policy
Welcome to the CBA Provider Network

It is challenging to provide HIV prevention services in a rapidly changing environment. Organizations that seek help to do this work are better able to maximize their resources and talent and become more effective, efficient, and self-sustaining. The Capacity Building Assistance (CBA) Provider Network – or the CPN – strengthens community-based organizations, health departments, and healthcare organizations in their high-impact HIV prevention initiatives – at no charge!

Capacity Building Assistance is NOT one size-fits-all. Each CBA Provider organization is equipped to provide services in distinct ways and tailored to meet the needs of each recipient organization.

The CPN’s goal is to build the capacity of our nation’s HIV prevention workforce, thereby reducing HIV infections and HIV-related mortality, mortality, and health disparities across the United States and its territories.

Our Strategy

- Increase accessibility and availability of culturally and linguistically appropriate CBA including consultation services and facilitation of peer-to-peer mentoring for HP and supporting activities;
- Increase utilization by the target audience members (recipients of CBA) of culturally and linguistically appropriate CBA; and
Next Steps

- Set up a profile on the PrEP Learning Collaborative site: pride.collaborate4health.org
- Participate in the monthly PrEP working group videoconference calls (and please suggest topics!)
- Post a question/comment in the discussion forums
- Share/download a resource
- Tell us what is helpful/what can be improved
